Workshop Objective

The S\textsuperscript{3} Workshop provides a unique venue for graduate students around the world to plan, manage, and experience a vibrant workshop focused on research in all aspects of mobile wireless networks. The workshop encompasses both theory and systems research, exposing participants to the full breadth of research in networking. As its name suggests, the workshop is organized by students, and the technical sessions are given by student presenters. It aims to foster early-career development among students and expose them to the workings of an academic life. It encourages students to actively participate in the networking research community and offers unique networking opportunities.

Why sponsor the S\textsuperscript{3} workshop?

Sponsoring S\textsuperscript{3} will give your organization increased visibility within the computer networking community, especially among talented PhD students. Supporting this student-organized workshop will benefit the community of student researchers. We will acknowledge all supporters during the conference opening remarks and prominently display company names and logos on the S\textsuperscript{3} website. You can also direct your funds to name specific awards such as Travel Grants, Best Papers, and Best Posters. With your sponsorship, S\textsuperscript{3} will give financial awards to the student attendees and TPC members, who otherwise may not be able to attend due to financial constraints.

Previous S\textsuperscript{3} Workshops

S\textsuperscript{3} has been held in conjunction with ACM MobiCom, one of the most prestigious conferences in mobile networking, for the past four years. Previous workshops have attracted over 60 participants, including several ACM MobiCom attendees. Traditionally, the workshop has been sponsored by ACM SIGMOBILE and industry partners.
